Leeds Association of Engineers.

FTAO. Mr. M. Murray.

Experience resume.

Dear Sirs.

1954. Apprentice Plater/Template Maker at Patchett's Fabrications Ltd. Dewsbury Road Leeds. Including 12 months in Drawing Office, working on buildings, structural and general fabrications.

1960 - 62 National Service RAPC. With time at Woolwich Arsenal in London and Ovenden Park Halifax.

1963 - Redundant.

1964 - Commenced working at Joseph Booth Cranes at Rodley Leeds, as Plater/Template Maker. Continuing progressively to Fabrication Inspection. Setting up department which included NDT. (Non-Destructive Testing) techniques. Qualified as CSWIP (Competency Scheme for Weldment Inspection Personnel). Weld Inspector, Industrial Radiologist, Ultrasonic Operator, and MPI. (Magnetic Particle Inspection) Operator.

1985 - At closure of Wellman Booth manufacturing, and forming of the Design and Sub-Contracting Business, I became Senior Inspector with responsibility for assessing potential suppliers and QC. of their products for onward submission to customers in the Nuclear Engineering, and Defence fields. I also surveyed existing cranes, structures, and machinery. Producing reports from which assessments of repair work and costing could be determined. I have carried out projects domestically and abroad, in countries such as France, Bahrain, Poland and America. One project was Off-Shore in the North Sea at the Rough Storage Field.

2004 - Retired, but requested by WB. and agreed, to work on contract for a further 12 months to help the transition.

Yours Faithfully.

Colin K. Bell.
